EXAMINER'S AMENDMENT

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicants' submission filed on October 15th, 2009 has been entered.
2. Claims 1 and 9 have been amended. Accordingly, claims 1-3, 6-9, and 12-20 are pending in this application in which claims 15-20 have been withdrawn from further consideration as being drawn to non-elected invention.
3. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.
4. The application has been amended as follows:

In the claims:

This application is in condition for allowance except for the presence of claims 15-20 directed to non-elected invention without traverse. Accordingly, claims 15-20 have been cancelled.

Please cancel claims 15-20.

Allowable Subject Matter

5. Claims 1-3, 6-9 and 12-14 are allowed over prior art of record.

Reasons For Allowance

6. The following is an examiner's statement of reasons for allowance:

After further search and consideration of Applicants' response filed on October 15th, 2009 (see Applicants' argument in Page 8, lines 9-20 of the October 15th, response), it is determined that the prior art of record neither anticipates nor renders obvious the claimed subject matter of the instant application as a whole either taken alone or in combination, in particular, prior art of record does not teach or suggest "wherein the outer well region and the inner well region each have an upper surface that includes a source and drain dopant regions, wherein the source and drain regions of the inner well regions are separated from the source and drain dopant regions of the outer well regions by the isolation region comprising a dielectric material" as cited in independent claim 1 and "wherein the outer N-well region and the inner P-well region each have an upper surface that includes source and drain dopant regions, wherein the source and drain dopant regions of the inner P-well regions are separated from the source and drain regions of the outer N-well regions by the isolation region comprising a dielectric material", as recited in independent claim 9.

Claims 2, 3, 6-8 and 12-14 are also allowed as being directly dependent of the allowed independent base claims.

7. Any comments considered necessary by applicant must be submitted no later

than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
 - Hull et al. (U.S. Patent 6,172,378) disclose an integrated circuit varactor structure that include either an P-gate/N-well or N-gate/P-well layer configuration formed on an SOI substrate.
 - Stolmeijer et al. (U.S. Patent 5,742,090) disclose an integrated circuit device has a plurality of active devices which are formed on a semiconductor body.
